

WINSTON YEO, ARCHITECT, LEED AP BD+C  
Bachelor of Architecture, Cornell University, 2006

Winston has over 6 years of international design and project management experience across a wide range of project types, from large-scale master planning and infrastructure projects, to smaller cultural and residential developments. His experience across the US, Middle East and Asia, has imbued Winston with a keen appreciation for culturally specific design response and processes, within the wider dialogue on design evolution.

Winston was the senior designer on the award winning Irving Convention Center, in Irving Texas. He developed the concept geometry and façade design for the 275,000 gsf convention center, and led its development from schematic through construction documentation. All project phases were designed and documented in Revit, a building information model (BIM) that proved instrumental for effective cost control and management of the building's complex geometry. The project was honored with the 2008 American Institute of Architects' Award in the un-built category, and has been LEED certified upon its completion in January 2011.

Since 2010, Winston has relocated to Shanghai, and was the local project manager on the 2.5 million gsf Research and Development campus for Huawei Technologies in Wuhan. He also worked as a senior designer on the 770,000 gsf Nanjing A1 Campus for the same client, and has led the design of the competition submission for the 800,000 gsf Shanghai International Dance Center.

Prior to his relocation from New York, Winston has also been involved with strategic business developments for the RMJM US operation. He identified emerging demand-base markets, and introduced specific prospects from Hong Kong and Singapore in the senior housing sector. Winston also represented RMJM New York as a senior designer during their 3-week collaboration with Gehry Partners in 2009, on their bid for the Anaheim Regional Transportation Inter-modal Center (ARTIC).

Winston has given design workshops at the Parson's School of Design, in fall of 2009 & spring of 2010, and has served as a design critic at various academic institutions in the New York region. He has passed all New York state architecture licensing exams, and is a LEED accredited professional with specialization in building design and construction.

## Professional Experience

2010 – 2012 Associate, Senior Designer 主任, 高级建筑设计师  
RMJM / New York & Shanghai

As the China Project Manager representing RMJM New York, Winston successfully maintained and expanded the existing New York client base, put into motion 2 strategic alliances with local design institutes for new work in the Master Planning & Health and Sciences sector, and materialized 3 significant R&D projects from two of China's largest telecommunication companies.

Winston has also led the concept design of several large-scale mix use projects out of the RMJM Shanghai office. This includes the 75,000sm Nanjing Cultural Landmark Tower, the 77,000sm Huawei Nanjing A1 R&D lab, and a bid for the 80,000sm Shanghai International Dance Center.

2008 - 2010 Senior Designer, 高级建筑设计师  
3i + RMJM / New York

Conducted independent market research for the RMJM subsidiary, 3i, under the guidance of Christ Jones and Richard Bailes, to identify strategic demand-base markets for investment. The study, MEDeco, focuses on the demographic trends in China as well as South East Asia, and identifies opportunities to engage using RMJM's core competencies.

Projects with significant contribution as a senior designer during this period includes the Tianjin Xiaobailou; a 300m Tall mix-use tower, Al Qudra Children's Hospital, and the King Abdulla Financial District, in the UAE.

2009 Senior Designer, 高级建筑设计师  
Gehry Partners + RMJM / Los Angeles

3 week intensive collaboration with Gehry Partners in their LA office, on the design competition for Anaheim Regional Transportation Inter-modal Center (ARTIC). Winston coordinated the station design by RMJM, with the sculptural canopy developed by Tensho Takemori's team.

2007 – 2009 Designer, 建筑设计师  
Hillier, RMJM Hillier / Princeton

Developed the Concept Design and Façade design for the 27,500sm Irving Convention Center, and led it's developments from Schematic through Construction Documents. The project was conceived and documented using Revit - building information model software (BIM), and received an AIA award in 2008 under the un-built category. The building has since been LEED certified upon completion in 2011.

2006 – 2007 Designer, 建筑设计师  
Hillier / Princeton

Worked on competitions and concept design for a wide range of projects under the guidance of Barbara Hillier and Bradley Walters. Projects with substantial contribution include the Ras Al-Khaimah Gateway Project, the Peddie Natatorium, and Solebury Township Highway Facilities.

2004 & 2005 Intern, 建筑实习生  
KPF / New York

Completed the final revisions for the curtain wall bid set on the International Commerce Center, Hong Kong, and designed the front entrance canopy for the New York Presbyterian Hospital.
